NetInfo Profile

NetInfo provides professional engineering services, staff augmentation, and training in Compact and scalable network solutions and services, broadband wireless planning, design, development, deployment and operations for facilities-based and virtual broadband Wireless and Wireline networks for local and wide area portability. NetInfo helps people and businesses communicate better through its industry proven expertise in wired and wireless networking.

Company Mission

NetInfo Our mission is to be the leading global innovator, developer and solution provider of wired, wireless and PCS/3G solution products, systems, and services. As a team, we will achieve aggressive growth and fair return for our shareholders. We will accomplish this by exceeding the expectations of our customers while conserving resources and improving the quality of the Service. This statement is an expression of our mission and shared values, the achievement of which is an ongoing challenge and a never-ending process. It requires us to respond effectively to an ever-changing environment. It requires pragmatism and dreams, courage and confidence, trust and commitment. It is our Quest for Excellence.

Who We Are

We are NetInfo, proud to be the leading Solution provider and developer of premium voice/data networking services in the Gulf (KSA – UAE). We provide designing and development, installation, maintenance, turn-Key projects and technical services for the critical and demanding applications of our client institutions, organizations and industries.

We were established in 2001 by an expert team of Network/Telecom Technologists, at the dawn of an age in which the Information Technology and Voice/Video/Data/Telecomm Network lodging industries would flourish like never before. Over the years, we expanded our horizons to serve Government, Corporate, Industries, Organizations, Institutions, and beyond. We have now grown to over a dozen specialists in a wide variety of advanced technologies related to broadband voice and data for wireless local and wide area mobility and portability over physical or virtual infrastructure. Our solid team of systems engineering experts has an in-depth experience in RF planning, network design and network implementation.

This team gives customers professional services and superior technical support to communities worldwide. Services include 24/7 product support, training, network and system design, turnkey installation, maintenance and field engineering .

Wireless Solutions

Our Wireless Point-to-Point & Point-to-Multi Point Solutions gives our customers a fully integrated service intelligent platform for building high-density fixed broadband wireless networks for personalized service delivery. Wireless networking applications and services require an infrastructure that enables high bandwidth performance, ubiquitous coverage and robust delivery capability for WLAN.

WiMAX

WiMAX represents the next evolution in broadband wireless technology. WiMAX stands for Worldwide Interoperability for Microwave Access and it is the latest and most-hyped, generation of fixed wireless technology in years. WiMAX is all about delivering low-cost broadband wireless access

Networking & Cabling Solutions

NetInfo supply internetworking hardware from the leading manufactures for networking products in the world. All Kind of Network Devices; routers, layer 2/3 switches, content switches, firewalls, Intrusion detection systems Complete Networking solutions are being provided at NetInfo. NetInfo experienced consultants offer their expert advice to design your network to ensure it is designed and implemented properly and supports future expansion (scalability).

At this demanding age of performance, network cabling has become an specialized science and NetInfo has the expertise in installation, testing and maintaining high speed networks to the best possible standards. By providing the utmost quality of service in the structured cabling industry, we preserve and improve the confidence of our customers.

Security Services

NetInfo is authorized partner of Risk Diversion, we both provides the very latest in customized security solutions to a wide range of industry sectors, including government bodies, banking, oil, gas and other organizations where information and communication content is highly confidential.
